

# **Celebrations! on Location | University of Phoenix Stadium, Glendale Arizona**

For Super Bowl XLIX our team had the exciting opportunity of traveling across state lines to Arizona where we installed three of our distinguished Structure tents. Our team of specialists installed custom wooden frames directly to our structures in order to portray an old Western theme. The structures that were installed vary in size, including two tents that measure to 32'x50' and one tent that measures to 32'x32'. Celebrations! was privileged to install such unique structures for such an international event!

## **Color Stories | Neutrals**

2015 is the start of a whole new year of weddings! Starting off the New Year we are falling in love with natural and neutral color palettes. Adding greenery to a wedding full of neutral colors is an easy way to add a subtle pop of color. For a softer look adding hints of blush creates a beautiful natural feel. The best thing about these colors is that it can be used for any kind of event, not just weddings! You can use these soft colors for a birthday party or even a baby shower for a boy or girl.
