

America's Cup – San Francisco

[rev_slider_vc alias="Americas-Cup-San-Francisco"]We had the great opportunity to provide tenting for the Luna Rossa Racing Team in 2013 during the America's Cup. Their base camp was located just below the Bay Bridge in San Francisco, and included a number of Clearspan Structure tents that housed their offices, lounge areas, and even storage for the boats. This project took 2 months to install, and we created full functioning offices complete with restrooms, climate control, flooring, and even tinted windows. We are very proud of the end result, and to have partnered with such a wonderful organization.
